

Effective September 1, 2019 Oberlin Cable Co-op will be increasing its basic fees as outlined below. The Board of your Community Cable system arrived at this difficult decision after careful consideration of the rising costs we are being charged to bring you the level of entertainment and information that you enjoy as well as our own operating expenses. As with all providers, we must pay an acquisition fee for each and every channel we provide as well as our own local and regional channels. Without such an increase, we were facing the possibility of ending this year in a deficit financial position.

In the near future, we will be providing you with more detailed information regarding this decision. In the meantime, we welcome your comments and questions about this – or any other matters involving Oberlin Cable Co-op – Your Community Cable system.
